FACE LIFT®

## WHAT IS THE VAMPIRE FACELIFT®?

The **Vampire FaceLift®** procedure combines the science of hyaluronic acid (HA) fillers, your own platelet rich plasma and the artful eye of a skilled provider to deliver youthful, natural beauty that is as unique as you.

Certified **Vampire FaceLift®** providers use the mathematics of beauty (dating back to Leonardo da Vinci to the present time) to design a younger, but natural shape.

## HOW DOES VAMPIRE FACELIFT® WORK?

The **Vampire FaceLift®** procedure begins with a simple blood draw from your arm.

Using instrumentation approved by the FDA for isolation of platelet rich plasma for injection back into the body, your provider will then process your blood at the bedside to isolate the PRP.

 This takes about 30 minutes.

Next, your provider uses hyaluronic acid filler (like Juvederm® or Restylane®) to add a natural collagen scaffold based on your facial structure and the mathematics of beauty.

Finally, your provider will inject PRP into the face so that the body's own healing process triggers the regrowth of new tissue and blood flow to recreate your younger self. Though bruising can occur, most will see a younger, natural appearing face that day!

## WHO CAN GET IT?

Almost anyone can get a **Vampire FaceLift®**.

Your doctor or nurse will help you determine if this is the best procedure for you.

If you have droopiness due to volume loss, dull looking skin and have lost your “rosy” complexion, this might be the procedure for you.

## WHAT CAN THE VAMPIRE FACELIFT® DO FOR YOU?

You can experience a fresher, more youthful appearance skill fully designed for your face.

Expect more healthy looking skin, tissue repair and growth in all areas where the platelets were placed.

Most clients report an increased vibrancy and glow to their skin. Scars can improve.
